

## Mathematics

To begin the term year 4 will continue to build upon our learning of efficient mental and written addition and subtraction strategies.

We will also be comparing areas, perimeters, lengths, volumes, capacities and masses using formal units of measurement.

To finish the term will we identify and continue number sequences and patterns.

## Japanese

Ikimashou! Let's go! This term we learn the vocabulary for places. We will be using the verb "go" as a springboard for understanding the grammar rules about verbs. We will play games, use role-plays and stories to increase our ability to use this language in a natural way. Throughout all of this we continue to focus on hiragana reading and writing. Ganbarimashou! Let's do our best!

## Year 4 Term 2 2022

Teachers: Hannah Brydie-Watson and Aaron Flynn

We are excited for term 2 with our classes. Our students will continue to be given opportunities to build and develop positive social skills and will be encouraged towards independent thinking and learning. We are happy to answer any questions, so please feel free to contact us to address any concerns.

### Inquiry

This term year 4 will focus on History for our integrated unit of work. We will investigate First Contact between the First Fleet and Indigenous Australians. This unit will link to our writing topics (information reports and recounts).

### Environment Centre/Science:

In chemistry the Year 4 students will be investigating the properties of natural and processed materials. They will be investigating the environmental impacts of packaging and if there are realistic sustainable options.

### Visual Arts

Charcoal has an X factor. There is just something about it. It is messy, unpredictable and the students in year 4 love it because it is a tool they probably don't have at home. This term by using Charcoal allows the year 4 students to achieve dark values quickly and blend with ease. Year 4 will learn how to sketch and explore a range of values and mark making. Once they've mastered some of these skills they will move into producing a piece of artwork inline with their inquiry unit 'First Contacts'. - Mrs Banwell

## English

### Reading, Writing, Listening, Speaking and Viewing.

This term students will be developing skills in **information texts and recounts** which will link to our History unit of work. Students will continue to develop planning, drafting, proofreading and editing skills. Classes will engage in regular, independent, and cooperative reading sessions. To develop their spelling strategies, students will engage in a range of learning opportunities including 'Words Their Way' which is targeted at their stage of development and vocabulary discussions in class. In speaking, students will participate in Rostrum.

### Physical Education

In PE this term, students will finish an exploration of invasion games by playing an indigenous running and passing game called Buroinjin. This was a ball game played by the Kabi Kabi people of south Queensland. The game was played with a ball made of kangaroo skin, which was called a buroinjin.

Later in the term students will commence a mini gymnastics unit focussing on balance, body awareness and movement patterns.
