

## Mathematics

In mathematics this term, students will have the opportunity to continue developing mental and written strategies for addition and subtraction, learn about and read time to the quarter hour and continue their learning on the concepts of volume and capacity. Students will explore and interpret simple maps, look at the effect of one step slides and flips and investigate half and quarter turns.

## The Arts

This term in art we will look at the work of famous artists such as Albert Namatjira, Sidney Nolan and Claude Monet. We will explore their lives and recreate some of their most famous works. We will also be looking at the colours and textures found in plants and animals and creating artworks of nature using a variety of textures and techniques.

## Year 2 Term 2 2022

Teachers: Libby Mackie and Lara Wilson

Welcome to Term 2 at Farrer! This term we welcome Libby Mackie who will be teaching 2M. We look forward to continuing to provide a positive, caring and educationally stimulating learning environment for all students. We will continue to work towards both our class and individual literacy and numeracy goals, encouraging students to be independent and creative thinkers.

### Health/P.E. with Brett Maron

In this unit students will use fundamental movement skills to perform long-rope skipping sequences to rhymes, as well as individual skipping sequences. They will identify how their body responds to physical activity.

### Japanese with Maron Sensei

Kyuo no tenki wa dou? What is today's weather like? Our Japanese vocabulary learning this term is based around the weather. We will learn how to discuss the weather with friends and even speak more formally like a weather reporter. We will also continue learning some sight words in Japanese and practice writing in hiragana. This is all tricky work but great fun as we do much of our learning through playing games, singing songs and listening to stories. Tanoshii!! Fun!

### Science with Jan Elliot

The students will complete their investigation concerning the biodiversity of soil before moving on to further develop their understanding of how forces affect the behaviour of objects. They will explore how a push or a pull affects how an object moves - its speed, acceleration and direction and that objects are affected by a range of contact and non-contact forces. Students will explore the way objects move on land, through water and in the air.

### Technology

This term Year 2 will be working on iPads and Chromebooks in the classroom. Students will learn how to log in and out of Chromebooks, Seesaw and a variety of applications. They will also use the Chromebooks and iPads during group activities, including maths, English, history and geography. Students will begin using Google slides to present information.

## English

Our daily English block focuses on components of reading, writing, grammar, spelling, speaking, listening and viewing.

Students will develop an understanding of descriptive writing and work to compose their own narratives. We will design our own character profiles, look at how adjectives greatly inform the reader and construct draft and final copies of our narratives.

In reading, students will have the opportunity to learn a range of strategies to support their comprehension.
